# AFRICAN QUEEN

"THIS WAS A TYPICAL QUEENSLAND inner city property on a tight corner block with three road frontages," explained Jack Jakovac of Majestic Pools and Landscapes. "The primary concern of the clients' was to create privacy, with a lush tropical feel and a good party atmosphere."

"Natural rocks and water features were special requests of the clients, together with the specification of extra generous ledges for entertaining."

"Because of the restricted nature of the site, the huge boulders used in the landscaping had to be craned in, which was a bit of a feat in itself."
